

## **Connecting to Health Care: Comprehensive primary care is available for Syrian refugees across the GTA**

20 health care organizations with experience working with refugees (Community Health Centres and University of Toronto family medicine sites) have expanded services to offer comprehensive primary care to incoming Syrian refugees across the GTA. Interpreter services are available. We recommend refugees be seen within 2 weeks of arrival in Toronto.

### **Services provided are covered under health insurance and include:**

- Help with acute medical issues
- Chronic disease management, such as diabetes or hypertension
- Full primary care for children including immunizations
- Prenatal care
- Family planning advice
- Preventive care to avoid future illnesses including immunizations
- Mental health
- Routine screening for chronic disease and cancer
- Community health centres can also make referrals to settlement and other relevant social services

### **How to book an appointment**

To book an appointment for any Syrian refugee that will be arriving, or is here already, please call **416-323-6400 ext. 5905** and leave a message. We will get back to you within 24 hours and arrange an appointment.
